Most people with ulcerative colitis (~90%) have mild-to-moderate disease,¹ and can be managed by primary care physicians² with a focus on maintaining remission and minimising complications.³

This two-hour online education module reviews appropriate therapy and management of ulcerative colitis according to current guidelines and best practice. The module incorporates two case studies that were developed by an expert planning committee to illustrate diagnosis, management and surveillance.

Do you feel confident managing patients with inflammatory bowel disease?

Can you effectively distinguish between inflammatory bowel disease and irritable bowel syndrome?

Would you like to learn more about managing patients with ulcerative colitis?

Planning committee

- **Professor Jane Andrews**
Gastroenterologist, Head of IBD Service & Education, Department of Gastroenterology & Hepatology, School of Medicine, University of Adelaide, Royal Adelaide Hospital, SA
- **Dr Gregory Moore**
Gastroenterologist, Head of IBD, Gastroenterology & Hepatology Unit, Monash Medical Centre, Senior Lecturer, Department of Medicine, Monash University, VIC
- **Dr John Tsingos**
General Practitioner, Souths Juniors Medical Centre, NSW
- **Dr Geoffrey Campbell**
General Practitioner, Langpark Medical Centre, VIC

By the end of the activity, knowledge and management of ulcerative colitis will improve in accordance with current Australian recommendations and participants will be able to:

- Differentiate inflammatory bowel disease (IBD) from irritable bowel syndrome (IBS)
- Describe current ulcerative colitis severity and first-line investigations
- Define referral pathways for people with ulcerative colitis including urgency
- Describe how ulcerative colitis extent and severity influence disease management
- Implement appropriate therapy for ulcerative colitis including routine monitoring, assessment of adherence and prevention of complications*

* Patient safety learning outcome

Learning outcomes

The **educate for success** education module has been approved by the Royal Australian College of General Practitioners (RACGP) QI & CPD program for 4 Category 2 points and 2 ACRRM core points.
